OVERVIEW

The brand new EP of the Flemish pagan metal band **THEUDHO** is now available as a free download. Their first release since 2009 is the prelude to the "When Ice Crowns the Earth" album, the title track being a tribute to the mythological origins of warfare in the history of gods and man alike.

"When Ice Crowns the Earth", due out November 2011, promises a more guitar driven sound, more diverse songwriting, a technical precise execution of the music and a better production, to deliver **THEUDHO's** best album to date.
